DESIGNING YOUR PERFECT SPACE

We make it our mission to help you find a space that will best fit your needs. Our customizable models allow for flexibility for us and functionality for you. Each one of our products goes through a meticulous and thorough design process, where we take the time to integrate our customers' feedback into each of our designs. Once you have chosen a model one of our team members will sit down with you to discuss which design will work best for your situation. From there, they can help guide you into customizing your dream structure. We have built our business on the idea that every structure we build, is built the way the customer wants it. Quality structures that will fit perfectly in any space, for any purpose. At Weaver Barns, we do it your way.

**A FREE DESIGN
CONSULTATION**

BASIC

CUSTOMIZED

Welcome

Since 1994 Weaver Barns has been building two things—structures and a reputation for unmatched quality. We strive to provide the best in everything we do, from customer service to manufacturing to installation. Quite simply, we provide you an excellent product that you and your family will enjoy for many years to come.

DESIGN STYLES

To find a style that best fits your standards, we have a large variety of features for you to choose from. These styles are all unique and customizable, so you can find one that fits best into your space. Unlike other brands, our designs are not only based on appearance, but also on their functionality and durability. If you aren't sure what style will work best for your structure, our team is always eager to help guide you by giving recommendations specific to you and what you're looking for.

THE IMPORTANCE OF SHELTER

By definition, a shelter is a place where you can find protection. It should also be reliable and long-lasting, which is what we focus on here at Weaver Barns. When building your structure, we take the time to make sure that every step of the designing and building processes are done with the most precision and accuracy. Not only are our structures built to be reliable, but they are also built to look great and add a unique element to your home.

OLD WORLD GARDEN FARMS

Weaver Barns gives flexibility, the ability to customize, and most importantly, quality, to each customer we serve. Customers Jim and Mary from *Old World Garden Farms* fell in love with our designs and their ability to customize our structures to work specifically for their needs. Featured on this page are a few of the structures we have built with them. You can find more features on these building projects at their home and garden website. oldworldgardenfarms.com

**DELIVERED
& BUILT ON
YOUR SITE**

OUR PRICES INCLUDE DELIVERY
WE DELIVER TO YOUR SITE

**PREBUILT
& DELIVERED**

DELIVERY

BEYOND FREE DISTANCE
\$1.00 Per Foot Carry Charge

CARRY CHARGES

Since every building site is different, one of the challenges of construction is how close to the building site we can drive to. For your convenience, we include a fifty foot carry allowance in the pricing for buildings 14'-16' wide. For buildings 8'-12', we include one hundred feet free. Over those distances the crew will charge \$1.00 per foot over the allowed distance.

**Carry Charges Are Paid To The Crew Directly*

QUALITY

A No Compromise Approach

At Weaver Barns, our culture is quality. Every aspect of the projects we do is done right. We care about building something that will last. We understand that our customers need a space that will stand the test of time. From custom milling our floor boards to buying premium grade lumber, to using the finest materials we can source, we do not just build a shed, we build the Weaver way.

FOUNDATION TYPES

BLOCK SITE PREP

*Not Recommended For Grades Exceeding 8"

Place 8" x 16" x 4" cement blocks underneath the skids. Every skid needs a block at the front and back and then additional blocks need to be placed in the middle spaced not more than 6' apart.

LIMESTONE PAD

*The Most Popular Choice For Sheds

Spread 4" of #57 limestone in a level pad 12" beyond the width and the length of the building on all sides. Also, you may want to use a 4 x 4 as an edge as shown in the example below.

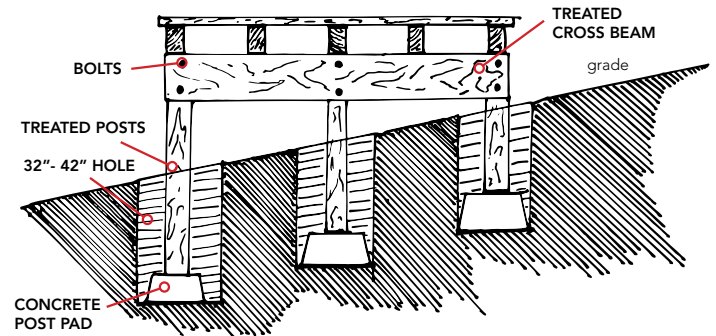

CONCRETE FOUNDATIONS

Pour the pad 1/2" less than the dimensions of the building. We attached treated plates to the bottom of the walls protecting the walls from moisture and rot. These bottom plates are fastened to the concrete pad with anchors or bolts.

POST PLATFORM FOUNDATION

Use treated posts. Dig the post holes 32" - 42" deep. Place post pad or concrete in the bottom of the hole. Insert posts. Fasten cross beam joists with bolts to posts as shown making sure that the entire structure is square.

SHED ON SLAB

To attach a shed to a slab, have your concrete contractor add a 4" reinforced curb. This will keep water from entering the structure.

SKID PLACEMENT

WHAT SIZE IS RIGHT?

When determining what size is right for your structure, we encourage you to talk to one of our qualified team members to figure out what works best for you. There are a lot of decisions that go into creating a structure, and we want to make that process as easy as possible for you, whether it's a custom home or even a shed.

Easton

Studio • Office • Storage

With the EASTON, we re-imagined what a shed can be. Gone are the limitations of traditional shed design and construction. We focused rather on designing a shed for a new generation. With a modern roofline and unique door awning, we bring you a new design that will re-define the industry.

HOW IT'S BUILT

BACKYARD BASICS

Simplicity Built Right.

Simple is sometimes better. At Weaver Barns, we decided to take this principle and turn it into our BACKYARD BASICS. Using our core models, we created this new line that focuses on simplicity.

**2 YEAR LIMITED
WARRANTY**

The first model, the JACKSON, features a classic gable-style roof. We created this design with a focus on functionality and simplicity. This model is a fantastic option for those in search of a storage space or workshop.

Our second model, the ADDISON, stands out with its clean lines and modern shed roof. This design makes the perfect pool house, studio, or garden shed!

Our third and last design in this collection is the CAMDEN. This classic-style pavilion will make your backyard the envy of the neighborhood with its simple yet classic elegance.

Dutch

Great as a workshop or storage structure for larger items due to its high sidewalls, our versatile DUTCH with a steel entry door offers a safe, comfortable environment. It features an eye-catching gambrel style roof, with lofts and lean-tos available to add style and functionality. Quality features and plenty of options ensure an attractive, dependable barn you can rely on for years.

Aspen CABIN

Imagine yourself looking out across a beautiful lake setting or a majestic mountain vista. We all love these moments and what a better way to enjoy them than with an ASPEN CABIN. With its one level floor plan and open spaces it feels open and airy. Big windows allow lots of natural light and views of the surrounding landscape.
